

Early Intervention

Little Learners

Our experienced Early Intervention team works alongside families to help them support their child's learning through setting foundations for future growth and development. We offer families individual and group programs. Services are tailored and include education regarding diagnosis and therapies, setting and working towards developmental goals, assistance with specialist medical appointments and transition to childcare, preschool and school.

Our Early Intervention individual and group programs are a fun and effective way for our clients to reach their potential.

Little Learners

Target Group

Children aged 0-18 months with a sensory impairment.

What to expect

Little Learners is a group program run during the school term. The group sessions are normally 90 minutes.

The group provides children and families an opportunity to learn together, connect with others as well as the provision of support and valuable information specific to your child.

Sessions are run by an Early Intervention Consultant along with a therapy assistant or student with families and siblings of the child also attending. Input is also provided by other Can:Do 4Kids allied health professionals, such as Speech Pathologists and Occupational Therapists.

Participants will be supported within the group around their individual goals with a focus on supporting the child's sensory needs, including:

- Appropriate lighting and positioning
- Appropriate environments to facilitate active listening as well as the use of contrast and sounds to supplement vision

- Education, support and information about vision development and language development
- Providing opportunities to maximise sensory and tactile experiences
- Using strategies to complement hearing where appropriate such as visual aids, key word signing and gesture

The program may be based at one of our metropolitan outreach centres.

Aims of the program

The Little Learners group aims to provide a range of play based activities targeting both individual and group goals which focus on general development. The following areas are included in the program:

- Sensory play
- Imagination
- Fine and gross motor skills
- Cause and Effect

These activities develop and improve children's fine motor development, attention and concentration, understanding of routines and turn taking, skills for communication and social interactions.

Goals of the program

Goals are individually negotiated with the child's family.

Early Intervention

Little Learners

Outcomes

Outcomes may include:

- Meeting specific individual goals
- Connecting families with other families
- Access to the community
- Increased understanding around vision/hearing impairment

Eligibility Criteria

Families must be registered for services with Can:Do 4Kids.

Staff

Early Intervention Consultants have a professional background in child development and learning. We work alongside families to support their child's learning through setting foundations for future growth and development.

Can:Do 4Kids Early Intervention Consultants work as a part of a multidisciplinary team alongside Speech Pathologists and Occupational Therapists, Assistive Technology specialists, Child and Youth Development Consultants, Orientation and Mobility specialists, Physiotherapists, Social Workers and Audiologists.
